

INTERLOCK elements[®]

Interlock elements[®] - a collection of designed kiosks that create impact areas within an exhibit space.

These complete kiosk sets can be used for product displays, identity communications, graphics, and electronic messaging to enhance your clients' tradeshow presentations.

RY series

RY series - a collection of designed kiosks that builds on the classic look of truss. The RY series of towers, counters, and cabinets challenges the preconceived image of truss on the show floor.

Designer Sets and build your own, a la cart components allow you to deliver complete solutions that help you deliver success to your clients. The RY series is today's high tech look of truss.

Contact Interlock for further information, specifications and prices on this series.
