

PerfTruss™

specifications

PerfTruss™ Decorative Ceiling Treatment

PerfTruss™ is a decorative design option for any INTERLOCK truss system. It is truss where perforated metal sheeting replaces conventional wire lacing. Four standard patterns of perforated metal are now available.

This highly visible form of truss is performing several functions. Its semitransparent look is ideal for concealing electric distribution equipment. PerfTruss can also be used as a light diffuser or standalone as a high-tech design accent.

CONFIGURATIONS:

Compatible with any INTERLOCK truss system.

LOAD BEARING CAPABILITY:

Reference load chart for appropriate truss system

CONSTRUCTION:

Standard Perforated Metal:
